

CORONAVIRUS COVID-19

As Coronavirus continues to be front of mind across the world, we wish to assure our patrons that their health and safety is paramount and as such, we have implemented additional measures around hygiene and safe food practices to reduce risk.

This will include the implementation of sanitising stations within the event facilities, and an increase in the regular cleaning services and public health messaging.

Coronavirus or COVID-19 spreads just like the flu – therefore hygiene is so crucial to help prevent the spread of the virus. We urge everyone to remain vigilant and to help protect the community by following the recommendations of the World Health Organisation:

- Wash your hands frequently with soap and water or use an alcohol-based hand rub if your hands are not visibly dirty, before and after eating, and after going to the toilet.
- When coughing and sneezing, cover mouth and nose with flexed elbow or tissue – discard tissue immediately into a closed bin and clean your hands with alcohol-based hand rub or soap and water.
- Avoid physical greetings and contact (handshaking and kissing) and maintain distance between yourself and other people, particularly those who are coughing, sneezing and have a fever.
- Avoid touching eyes, nose and mouth. If you have a fever, cough and or difficulty breathing, please seek medical care.

We ask that you please be mindful of everyone in attendance and comply with requests and instructions where given by staff and signage at the event.

Please monitor yourself for any early signs; a sudden high temperature, feeling very ill, coughing and aches and pains all indicate a possible infection. Please seek immediate medical advice in case you observe any of these symptoms.

If you do not feel well, please do not travel and do not attend the event. In the following scenarios, we ask that you please refrain from attending an event and recommend you seek medical assistance:

- left, or transited through mainland China in the last 14 days (please isolate yourself for 14 days from leaving mainland China)
- left, or transited through Iran on or after 1 March (please isolate yourself until 14 days after leaving Iran)
- left, or transited through South Korea on or after 1 March (please isolate yourself until 14 days after leaving South Korea)
- been in close contact with a confirmed case of coronavirus in the last 14 days (please isolate yourself for 14 days after the date of last contact with the confirmed case).

In case you get sick during the event, contact a member of the event team who will arrange medical assistance as required.

You do not need to wear a mask to this event if you are healthy. While the use of masks can help to prevent transmission of disease from infected patients to others, masks are not currently recommended for use by healthy members of the public for the prevention of infections like coronavirus.

For further information on isolation please
